

HIGH-END MULTIPURPOSE
CLIMATE CHAMBERS
WITH LED LIGHTING
EGC SERIES

TEMPERATURE RANGES

Standard from +4°C to +50°C.
Optional up to -30°C and +80°C for greater needs..

ECOLOGICAL.

Manufactured with a cooling system based on natural gases with a GWP of 3. F-Gas Compliance.

HUMIDITY RANGES

Standard from 30% to 90% RH.
Optional from 10% to 95% RH for more demanding tests.

LIGHTING.

LED lights for biotechnology applications with different positioning possibilities.

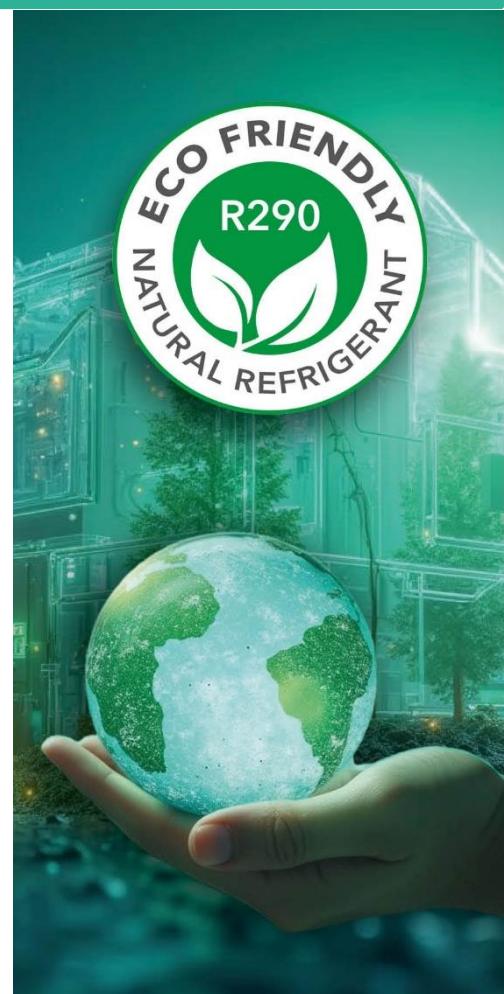

AIR FLOWS

Horizontal or vertical airflow depending on the application for which the equipment will be used.

FLEXIBILITY.

Control of CO2, air renewals, irrigation, etc. Multiple control options for other variables.

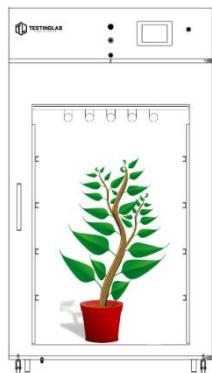

DIFFERENT VOLUMES FOR DIFFERENT APPLICATIONS

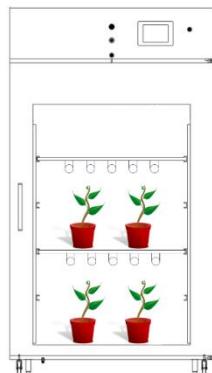

DIFFERENT LIGHT POSITIONS ACCORDING TO THE APPLICATIONS

Select the optimal lighting position in the chamber based on the application, from a top shelf position on the ceiling of the chamber for large plant growth, to lower intensity lighting positioned on the sides for algae growth.

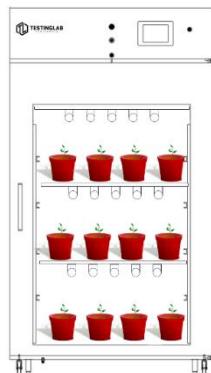

The EGS series is designed for any combination, allowing you to position the lights on the door, sides, shelves, or all of them.

OTHER FEATURES

Interior Glass Door

All models in the EGCS series feature an interior thermal glass door that allows viewing of work processes without altering temperature, humidity, or CO₂ concentration. The door features a silicone gasket seal to ensure maximum tightness and a large handle and lock.

Shelves

Made of AISI 304 stainless steel (AISI 316 or grid optional), perforated with guides and adjustable height. Maximum load capacity: 100 kg/m². Guides and grids are easily removable for cleaning.

Port with plug

For the passage of cables and/or probes with a diameter of 40 mm and a protective cap. Optional options available with different diameters.

Custom designs

Custom designs to suit your application with extended temperature ranges, extended humidity ranges, different volume configurations, multiple chambers in a single unit, and more.

Multiple accessories to choose from for specific applications or to enhance chamber services.

Various communication options: Ethernet, WiFi, SMS, and more.
